BOSCH

The Challenge

- **Master complexity**
- **Flexible E/E architectures**
- **Flexible exchangeability** between supplier's and manufacturer's applications
- **Keep quality & reliability** of E/E systems at high level
- **Enable global shared development**
- **Gain freedom for innovation**

- **Solution:** Reuse and exchangeability of software
- **Strategy:** Standardization of software architecture

BOSCH

AUTOSAR @ Bosch – Enable Exchangeability

Reuse/Exchange of SW Enabled by Architecture

→ Pre-condition for efficient integration of application software

- Standardized BSW ▶ AUTOSAR
- Standardized ASW interfaces ▶ AUTOSAR
- Well structured and modular ▶ e.g. Bosch application architecture

11

BOSCH

AUTOSAR – Status

E2006

Release 2.1

E2007

Release 3.0

- Resolved release notes
- Start-up / Wake-up behavior
- Application interfaces

M2008

Release 3.1

- OBDII (On Board Diagnose)

E2009

Release 4.0

- Error handling
- Functional safety
- Libraries
- Conformance Test
- Multi-Core
- Further Application Interfaces

Status / Achievements

- AUTOSAR Rel. 2.1
AUTOSAR is ready for use in automotive product development
- AUTOSAR Rel. 3.0 / 3.1
Product development can take fully advantage of mature AUTOSAR specifications

AUTOSAR – Planning Phase III

Phase III

2010

2011

2012

Release 4.1 is planned for 12/2012

Objectives of Phase III

- Maintain the existing AUTOSAR releases
- Add extensions to the existing specifications to further enhance the exploitation of AUTOSAR for automotive applications
- Incorporate experiences from exploitation

Time plan of AUTOSAR phase III

- AUTOSAR Phase III is contracted and started 01/2010
- In 2010 concept proposals are analyzed and selected for implementation
- In 2011 selected concepts are implemented
- In 2012 implemented concepts are validated,
 - R4.1 will be released in 12/2010
